Click any, it shows a list of the different options.
Each has a checkbox to enable/disable, plus
an "all" at top that turns everything on/off.
(Perhaps like hammer visgroups?)

Style Options:
Quiet: ☐

Gel-plates: ☐

Cave lines: ☐

Game:

Portal 2 V [+] [-]

+ will prompt to browse for the
game exe, and if found will
initialise.
- will show a warning/confirmation
box then delete the game.

If the game list is empty (check on
startup and on removing a game),
then prompt for the exe every time

Button next to music will play the
music (perhaps an edited short
sample, or extract from the VPK
every time?)
When the user clicks on anything
else stop this.
